Legal researcher working where law meets code. I study how the law should govern artificial intelligence and how AI tools should be judged inside legal practice, joining comparative research on AI liability and regulation with litigation practice before the Federal Court of Canada. Recognized by USCIS as an individual of extraordinary ability (EB-1A, 2024).

Research Interests

Liability for AI training data

Commercial use of large datasets to train AI, compared across U.S. and Canadian law.

AI governance and the rule of law

The EU AI Act, GDPR and MiCA, and their gaps in cross-border transactions.

Evaluating legal AI

What quality means for AI in legal practice and access to justice, and how to measure it.

Smart contracts

Enforceability, and the precision lost when legal norms become code.
